

With the key remote control

The screenshot shows the Multiecuscan 1.2R1 software interface. The 'Parameters' tab is selected, displaying a list of vehicle parameters and their current status. The parameters are as follows:

Parameter	Status
Left window down button	Released
Right window up button	Released
Right window down button	Released
CITY button	Released
Transponder comm. line	C-CAN
Immo coded by	1
Code from engine ECU	Received
Engine ECU status	Programmed
# of programmed keys	2
# of disabled keys	0
Last key #	0
Latest used key ID	00 00 00 00
# of stored remote controls	1
Latest used remote control	1
Last used remote control ID	239
Doors lock remote control button	Released
Doors unlock remote control button	Pressed
Trunk unlock remote control button	Released
Alarm mode	1

On the right side of the interface, there is a yellow box with the text 'Shows the status of the indicated component.' Below this box are several buttons: 'Monitor DTCs', 'Auto Up', and a set of buttons labeled 'S', 'R', 'L', 'U', 'A', and 'N'. At the bottom right, there is a 'Templates' button. The Multiecuscan logo is visible at the bottom left, and the vehicle information 'Fiat Panda '03 1.2 8V / Body Computer Siemens' is displayed at the bottom.

With the second key (without remote control).

The screenshot shows the Multiecuscan 1.2R1 software interface after using the second key. The 'Parameters' tab is selected, and the status of several parameters has changed compared to the previous state:

Parameter	Status
Left window down button	Released
Right window up button	Released
Right window down button	Released
CITY button	Released
Transponder comm. line	C-CAN
Immo coded by	1
Code from engine ECU	Received
Engine ECU status	Programmed
# of programmed keys	2
# of disabled keys	0
Last key #	2
Latest used key ID	17 C2 59 08
# of stored remote controls	1
Latest used remote control	1
Last used remote control ID	239
Doors lock remote control button	Released
Doors unlock remote control button	Pressed
Trunk unlock remote control button	Released
Alarm mode	1

The interface elements on the right, including the yellow status box, 'Monitor DTCs' button, 'Auto Up' button, and the 'S', 'R', 'L', 'U', 'A', 'N' buttons, remain the same. The 'Templates' button is also present at the bottom right. The Multiecuscan logo and vehicle information 'Fiat Panda '03 1.2 8V / Body Computer Siemens' are at the bottom.
